Response to Amendment

1. The amendment received 12/10/07 has been entered in full.

Response to Arguments

2. Applicant's arguments, see pages 7-9, filed 12/10/07, with respect to the claims have been fully considered and are persuasive. The rejection of the pending claims has been withdrawn.

Allowable Subject Matter

3. Claims 10-12, and 22-25 are allowed.
4. The following is an examiner's statement of reasons for allowance: As persuasively argued by the Applicant none of the prior art of record discloses determining, when said range is successively shifted, a predetermined parameter value related to an image to be displayed based on an altitude of virtual point of view according to a movement speed in a coordinate system in an instructed direction; identifying a plurality of original images with respective parameters defined based on the parameter value determined ... identifying a plurality of original images with respective parameters defined based on the parameter value determined; and performing a predetermined converting process upon the plurality of original images so that the parameter values of the plurality of original images match the parameter value determined ... and ... outputting a final image obtained by combining the plurality of original images so that their corresponding areas are made to overlap. As these limitations are present in each of the independent claims they are all allowable for the same reason.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 6,747,680 Speed-Dependent Automatic Zooming Interface.

US 6,339,434 Image Scaling Circuit for Fixed Pixel resolution display.

US 6,323,878 System and Method for providing zooming video capture.
